

# high tech bike care

All BLUBIKE products are  
E-BIKE compatible.

PREMIUM BUCKET  
Cod. 20.061

CLEANING BUCKET  
Cod. 20.060

## UNIVERSAL LUBRICANT

SLICK • 75 ml  
Cod. 20.000

SLICK is a universal synthetic lubricant with a medium viscosity containing special additives that protect against wear and rust, indicated for lubricating all bike parts. SLICK eliminates noise and protects all mechanical parts from humidity and corrosion.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- SLICK is ideal for those who use their bike daily or during free time. SLICK is ideal for all types of bicycles and in all weather conditions.

## HIGH ADDITIVE LUBRICANT

WET • 75 ml  
Cod. 20.001

Wet is a high viscosity synthetic lubricant with a low friction coefficient. The special additives provide excellent adherence to metal parts and reduce rusting and wear. Wet guarantees long lasting lubrication.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- This chain lubricant is ideal for long distances and tough riding conditions especially with high humidity or rain.

## BIODEGRADABLE LUBRICANT

BIO LUBE • 75 ml  
Cod. 20.003

BIO LUBE is a natural lubricant, over 95% biodegradable, studied specifically to lubricate and protect chains and any other part of your bicycle. BIO LUBE will not harm the environment and protects metal parts from rust and wear in all weather conditions.

- This chain lubricant is for the cyclist that loves nature and excursions in parks and reserves ecologically protected.
- Apply this product to clean, dry chain while turning the pedals. Avoid contact with brakes.

## DRY FILM BIKE LUBRICANT

X.DRY • 75 ml  
Cod. 20.002

X-DRY is a professional lubricant formulated with PTFE and special additives that reduce wear. This lubricant leaves resistant and stable film with a very low friction coefficient, able to resist to dirt and dust.

- The dry film that forms after application is composed of paraffin, PTFE and additives that protects the chain in dry conditions.
- Apply X-DRY a few hours before using your bike to allow complete evaporation.

## PREMIUM BIKE LUBRICANT

PREMIUM LUBE • 75 ml  
Cod. 20.112

PREMIUM LUBE CERAMIC is a new generation of synthetic oil enhanced with CERAMIC particles that assure the maximum in long lasting lubrication even in extreme conditions. The use of particular additives renders all moving parts particularly silent and protects from dirt.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- Shake well before using to permit the solid particles in suspension to disperse evenly.

## KRYTOX

KRYTOX • 15 ml  
Cod. 20.004

SB-10 is a KRYTOX® base lubricant developed in the DUPONT laboratories. This oil has the lowest friction coefficient among all lubricants already known on the market. SB-10 is extremely fluid and penetrates quickly into the chain parts, derailleurs, gears, cables, break joints, and ball bearings penetrating even its protection.

- As a chain lubricant this product is ideal for extremely fast road and track racing. Applied to bearings, joints, and forks this product offers perfect lubrication and repels dirt.
- Apply a small amount of product to clean dry parts.

## PTFE GREASE

STAR GREASE • 60 g.  
Cod. 20.007

STAR GREASE is a synthetic lubricant based with PTFE, formulated for professional use with a very low friction coefficient, exceptional thermal stability, long lasting, good weather resistance.

- STAR GREASE is suggested for bearings, hubs, headsets, bottom brackets suspension or during assembly.
- Consistency: NLGI 1. Temperature Range: -30°C until +150°C

## LITHIUM GREASE

LITHIUM GREASE • 150 g.  
Cod. 20.005  
• 500 g. Cod. 20.006

Multi-purpose lithium grease with special additives, offers high pressure load resistance and good response at high temperatures guaranteeing strong water repellent characteristics, corrosion and wear resistance.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.

• LG111 is suggested for bearings, hubs, headsets, bottom brackets or during assemblage. Consistency: NLGI 2. Temperature Range: -20°C until +180°C

## PTFE LUBRICANT

BIKE LUBE • 200 ml  
Cod. 20.009

BIKE LUBE PTFE is a high quality spray lubricant. The PTFE and other special additives reduce friction, eliminates noise, makes gear changing fast and fluid, and protects all mechanical parts from use and corrosion.

- BIKE LUBE PTFE penetrates into the chain easily and leaves a non adhesive film that protects against dirt and dust.
- This product is ideal for fast and easy lubricating.

## CHAIN CLEANER SPRAY

CHAIN CLEANER SPRAY • 400 ml  
Cod. 20.050

CHAIN CLEANER SPRAY rapidly cleans and degreases bicycle chain. This product will not harm paint or parts in plastic or in carbon fiber.

- Flammable product. Do not use near open flame.
- Retubricate carefully after every cleaning operation.

SLICK • 500 ml  
Cod. 20.035

WET 10/40 • 500 ml  
Cod. 20.033

BIO LUBE • 500 ml  
Cod. 20.036

X-DRY • 500 ml  
Cod. 20.034

PREMIUM LUBE • 500 ml  
Cod. 20.037

BRUSH KIT  
Cod. 20.049

CHAIN BRUSH  
Cod. 20.058

MICROFIBRE CLOTH  
Cod. 20.053

CHAIN MACHINE  
Cod. 20.016

## GREASE & OIL CLEANER

CHAIN CLEANER • 250 ml  
Cod. 20.010

CHAIN CLEANER is an odorless grease cleaner not delutable in water, ideal for bike chains and all oil or grease lubricated parts.

- Clean bike chains using brush or by adding required quantity to special CLEAN MACHINE.
- Relubricate carefully after every cleaning operation.

## GREASE & OIL CLEANER

BIO CHAIN CLEANER • 250 ml  
Cod. 20.011

BIO CHAIN CLEANER is a liquid grease cleaner obtained from natural extracts, over 95% biodegradable, ideal for bike chains and oil or grease lubricated parts.

- Clean bike chains using brush or by adding required quantity to special CLEAN MACHINE.
- This product, when conserved correctly in original bottle, maintains degreasing characteristics for two years.

## BIKE SHINE

SILICON • 200 ml  
Cod. 20.008

SILICON SPRAY protects all metal, carbon, and plastic parts of bicycles from dust, dirt, and water.

- SILICON SPRAY leaves a protective film that helps maintain clean and dry all treated parts. SILICON SPRAY can also be used to lubricate and protect chains, bearings and suspensions.
- Avoid contact with brakes.

## BIKE SHAMPOO

BIKE CLEANER • 500 ml  
Cod. 20.012

BIKE CLEANER is a surfactant soluble in water which removes all types of dirt and grime. This product will not harm paint or parts in plastic or in carbon fiber.

- Pump spray BIKE CLEANER directly on all dirty parts, wait a few minutes, then rinse with water.
- For best results use Shine & Protect after cleaning.

## BIKE WASH

BIKE WASH • 250 ml  
Cod. 20.054

Bike Wash is a concentrated biodegradable and neutral bike cleaner, ideal for deep washing bicycles. Respects all plastic and carbon parts.

- Add 5 cups of Bike Wash for 5 liters of water to create cleaning foam.
- Use sponge or brush, rinse, and dry with a cloth.

## SHINE & PROTECT

BIKE SHINE • 250 ml  
Cod. 20.055

Carnauba wax based protection and polish for the bicycle frame. Leaves a non-adhesive glossy film that protects the paint from dirt. It does not alter the plastic and carbon parts. Also excellent for polishing helmets.

- Shake the bottle vigorously and spray on clean surface.
- Dry and polish with a microfibre cloth.

## TIRE SEALANT

TIRE SEALANT • 500 ml Cod. 20.022  
120 ml Cod. 20.041

TS200 instantly seals tubeless and non-tubeless up to 5 mm. punctures.

- Shake the bottle and add sealant through valve stem with removable core or dismount and pour directly into the tire.
- TS200 remains liquid for 2-5 months. Active up to -15°C.

## INFLATE & REPAIR

INFLATE & REPAIR • 100 ml  
Cod. 20.023

The contents of this aerosol will repair and inflate for a fast tire puncture repair.

- Push the adapter onto the tire valve and inflate until the puncture is completely closed. NEVER use near open flames or on incandescent bodies.
- Inform the tire repairer of the use of this product.

## BRAKE FLUID

DOT 4 • 120 ml  
Cod. 20.029  
DOT 4 • 500 ml  
Cod. 20.030

Fluid for bicycle hydraulic disc brake systems. High boiling point, low viscosity, working temperature up to -40°C. Excellent anti corrosion properties, high lubricating properties, excellent chemical stability.

- Prevents foaming and overheating of the pump.
- Compatible with DOT 3

## FLUID SUSPENSION

FORK OIL 5W • 500 ml  
Cod. 20.038

A synthetic hydraulic fluid formulated for bicycle fork suspension and shock.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- Excellent damping performance at both high and low temperatures. Rapid incorporated air release, maximum protection against wear and corrosion.

## AQUA GREASE

AQUA GREASE • 60 g.  
Cod. 20.104

AQUA GREASE is a yellow color silicon grease with excellent lubricating characteristics. Its strong water repellent properties makes it the ideal choice in conditions with high humidity, and in rain and snow.

Consistency: NLGI 2 Operating Temperature: -20°C +120°C

## BIO GREASE

BIO GREASE • 60 ml.  
Cod. 20.046

Multifunctional, biodegradable vegetable source grease for lubricating all parts of the bicycle. This grease promotes low environmental impact while ensuring excellent stability, anti-oxidation and corrosion properties.

## CARBON GRIP

CARBON GRIP • 60 g.  
Cod. 20.047

C10 is used to create friction between two surfaces. Indispensable for assembling carbon bicycle parts allowing less tightening. C10 can cause slight abrasions at the contact points. This is a normal condition to allow a good seal.

## FORK GREASE

FORK GREASE • 60 ml.  
Cod. 20.048

FG12 is lithium-free special grease for lubricating shock absorber and fork. Lubricates, protects, and maintains your forks in perfect efficiency.

## BRAKE FLUID

BRAKE FLUID • 120 ml.  
Cod. 20.056

Low viscosity synthetic fluid formulated for bicycle hydraulic brakes. Assure maximum life of brakes with excellent performance in a wide temperature range. This product is 100% compatible with DOT Fluids.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- Prevents foaming and overheating of the pump. Will not corrode gaskets and plastic parts.

## BRAKE FLUID

BRAKE FLUID • 500 ml.  
Cod. 20.057

Low viscosity synthetic fluid formulated for bicycle hydraulic brakes. Assure maximum life of brakes with excellent performance in a wide temperature range. This product is 100% compatible with DOT Fluids.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- Prevents foaming and overheating of the pump. Will not corrode gaskets and plastic parts.

## BRAKE FLUID

Low viscosity synthetic fluid formulated for bicycle hydraulic brakes. Assure maximum life of brakes with excellent performance in a wide temperature range. This product is 100% compatible with DOT Fluids.

- This product is **ECO FRIENDLY** obtained from non-petroleum based renewable raw materials.
- Prevents foaming and overheating of the pump. Will not corrode gaskets and plastic parts.

## FORK OIL

FORK OIL 10W • 500 ml  
Cod. 20.039

Low viscosity synthetic fluid formulated for bicycle fork suspension and shock. Excellent anti corrosion properties, high lubricating properties, excellent chemical stability.

- Prevents foaming and overheating of the pump. Will not corrode gaskets and plastic parts.

## FORK OIL

FORK OIL 15W • 500 ml  
Cod. 20.040

Low viscosity synthetic fluid formulated for bicycle fork suspension and shock. Excellent anti corrosion properties, high lubricating properties, excellent chemical stability.

- Prevents foaming and overheating of the pump. Will not corrode gaskets and plastic parts.
